

my family tree

Become your own family historian.

Print out these three pages and use them to begin building your family tree and collecting the foundations of your family history.

One page is for your mother's side of the family and one page is for your father's side of the family.

Cut out the rectangle containing your own information and when you assemble the pages of your tree, tape the cut-out rectangle of your information between them where indicated, and tape the page edges together. In a sense, you are the "patch" connecting the two sides of your family together.
